

Who Are We?

Cause for Paws is a Minnesota nonprofit 501(c)(3) organization founded in 1998. We are a small all volunteer group of friends who love cats. Our main focus is helping stray and abandoned cats and kittens find loving, permanent homes. These are the cats and kittens one would find at many animal control facilities; discarded pets who had been doing their best to survive outside, hanging around neighborhoods and city parks. The work of Cause for Paws is entirely funded by donations and small fundraisers.

How does Cause for Paws work?

The volunteers of Cause for Paws care for these cats in their own homes. When families adopt cats from Cause for Paws, space is opened up in the foster homes so additional cats and kittens can be taken in. By adopting one cat or kitten, families help save many other cats too!

How Cause for Paws Help cats in the Community

As our budget allows, we provide spay/neuter assistance through our Spay/Neuter Subsidy Program. This program is for owned cats in the community and provides up to \$100 subsidy towards a cat spay and \$60 towards a cat neuter, with the owner paying the rest.

From all of us at Cause for Paws

THANK YOU

* Cyclamen are deadly to cats. Poinsettias are considered very low in toxicity, however they could cause mild vomiting and nausea if ingested by your pet.
